Bluewater Energy Solutions Awarded Startup and Commissioning Services for Constellation's Hyperion Project.

For Immediate Release

Bluewater Energy Solutions is pleased to announce it has been awarded a contract to perform startup and commissioning services for the Hyperion facility located in Los Angeles, CA.

Construction is underway at Hyperion. The 27-megawatt (MW) renewable energy power plant expects to be commercial by the end of 2016. The sewage treatment process at Hyperion generates a class 1 renewable fuel known as digester gas. The new power plant, which will cost approximately \$130 million, will use the digester gas produced at Hyperion as its primary fuel source to produce steam and electricity that will be used to operate Hyperion's treatment operations.

About Bluewater Energy Solutions

Bluewater Energy Solutions, Inc. (BES) offers Startup and Commissioning services from complete turnkey to itemized scope based on the project and client needs.
